West Irondequoit Central School District 5-Year Facilities Plan

CONTENTS

- CURRENT/RECENT PROJECTS
- POTENTIAL FUTURE PROJECTS
- EXECUTIVE SUMMARY
- NEEDS ASSESSMENT/PROBABLE COST DATA

CURRENT/RECENT PROJECTS

- 2023-24 Capital Outlay Exclusion Project (COEP) \$100,000
 - Status Pending SED approval
 - Scope Redesign of doors in Seneca basement (egress/security), flooring and related abatement.
 - Funding Included in 2023-24 annual budget

2023-25 RISE Project

- Status Voter approval May 2023
- Funding \$19,075,000
 - o \$8,000,000 from Capital Reserve
 - o \$11,075,000 bonded long-term debt

2023-24 Federal Stimulus Project

- Status SED approved.
- Scope Replacement of RTU 2 and 8 at IHS
- Up to \$1,925,000
- 2022-23 Capital Outlay Exclusion Project (COEP) \$100,000
 - Status Will be completed 6-30-2023
 - Scope Security: Teller-style window in Rogers vestibule
 - Funding Included in 2022-23 annual budget
- 2021-22 Capital Outlay Exclusion Project (COEP) \$100,000
 - Status Completed. Punch list items only
 - Scope Replacement of Seneca fire panel and sprinkler heads
 - Funding Included in 2021-22 annual budget

2019-21 Renewal Project

- Funding \$9,625,382
 - o \$6,000,000 from Capital Reserve
 - o \$3,625,382 bonded long-term debt
- 2020-21 Capital Outlay Exclusion Project (COEP) \$100,000
 - Scope: Replacement of Seneca Elementary School roof.
 - Funding included in 2020-21 annual budget.

2019-20 Smart Schools Project - Phase #1

- Status: Completed
- Scope: \$897,908 in security improvements. Updating to digital cameras and installing Incident Response System in our school buildings.
- Funding Smart Schools Bond Act (\$1,901,143 allocation)

2019-20 Capital Outlay Exclusion Project (COEP) - \$100,000

- Scope: School Safety. Replacement of approximately 30 interior doors at IHS
- Funding included in 2019-20 voter-approved budget.

2018-19 Capital Outlay Exclusion Project (COEP) - \$100,000

- Scope: Replacement of Boiler at Sproule Fieldhouse
- Funding included in 2018-19 annual budget.

2017-18 Capital Outlay Exclusion Project (COEP) - \$100,000

- Scope: Interior/Exterior LED conversion at Dake JHS
- Funding included in 2017-18 annual budget.

2016-17 Capital Outlay Exclusion Project (COEP) - \$100,000

- Scope: Replacement of stair treads and lockers at Rogers Middle School
- Funding included in 2016-17 annual budget.

2014-16 Promise Project -- \$8.7 Million Dollars

- Scope:
 - o Addition of two (2) Classrooms at Brookview, Briarwood, Southlawn/Rogers, Colebrook, Listwood plus interior renovations at Seneca for full day kindergarten.
 - o Replacement of Dake Roof
 - Replacement of the carpet for turf field and track surface at IHS
 - o Replacement of dust collectors for Technology at IHS and Dake
- Funding
 - o \$3.4 million from Capital Reserve.
 - \$5.3 million bonded long-term debt.

OTHER FUTURE PROJECTS

- Various security focused projects (cameras, building access, PA/notification systems, etc.)
 - o Funding Sources:
 - Smart Schools Bond Act (\$1,003,235 remaining) Phase #2

Anticipated Adoption by the Board of Education: June 15, 2023

West Irondequoit Central School District Five-Year Facilities Plan

EXECUTIVE SUMMARY

June 2023

This Five-year plan is prepared in conformity to Part 155.1 and 155.3 of the Regulations of the Commissioner of Education and the State of New York. It is consistent with the Regional Five-Year Special Education Space Requirements Plan required by Commissioner's regulation 200.2(g).

The intent of this Five-Year Plan is to identify the current condition of each of the West Irondequoit Central School District's facilities, and to serve as a tool for the District to actively manage its capital needs.

THE FIVE-YEAR PLAN TEAM

This Five-Year Plan was prepared by a team of District Personnel and consultants including:

West Irondequoit Central School District Personnel:

James Brennan – Assistant Superintendent for Finance
John Conti – Executive Director of Operations

Ann Cunningham – Board of Education
Aaron Johnson – Superintendent
Matt Metras – Board of Education

Christina Miga – Assistant Superintendent for Instruction

Kim Schon – Athletic Director

Casey Wagner – K-12 Director of Technology

Architectural/Engineering consultants: Korey Hunsinger – CPL

Brian Trott – CPL

RESOURCES

The following resources were utilized, and are included in the appendix of this Five-Year Plan:

Annual Visual Inspection Report Building Visual Inspection Report School Facilities Report Card

CONSULTANTS

The following third-party consultants were utilized, their reports are included in the appendix of this Five-Year Plan:

AVL (theatrical systems) Fetech (food service)

Vaysen Studio (educational planning)

BUILDING ANALYSIS

Briarwood Elementary School

This building currently is a K-3 grade level facility. The one-story building was originally constructed in 2002 and an addition was opened in 2016. The building currently has 20,904 square feet of usable space. Major building components are in good condition, including roofing, mechanical, electrical, and plumbing systems.

The following items are in the district's goals for replacement and/or upgrade within the next 5 years: Replace perimeter chain link fencing and storage shed, flooring, casework, roofing, roof top mechanical units, water heater, and lighting, provide masonry restoration, security film in select locations, upgrade the fire alarm and public address systems.

Educational program enhancements include renovating the library, multi-purpose room, offices and staff support spaces and creating opportunities for enhanced social emotional learning throughout the building.

Brookview Elementary School

This building currently is a K-3 grade level facility. The one-story building was originally constructed in 2002 and an addition opened in 2016. The building currently has 21,003 of square footage. Major building components are still functioning, including roofing, mechanical, electrical, and plumbing systems.

The following items are the district's goals of replacement and/or upgrade within the next 5 years. Reconstruct sidewalk from school property to Villanova Road, replace perimeter chain link fencing and storage shed, flooring, casework, roofing, roof top mechanical units, water heater, and lighting, provide masonry restoration, security film in select locations and upgrade the fire alarm system.

Educational program enhancements include renovating the library, multi-purpose room, offices and staff support spaces and creating opportunities for enhanced social emotional learning throughout the building.

Colebrook Elementary School

This building current is a K-3 grade level facility. The one-story building was originally constructed in 2004 and an addition opened in 2016. The building currently has 20,904 of square footage. Major building components are still functioning, including, roofing, mechanical, electrical, and plumbing systems.

The following items are the district's goals of replacement and/or upgrade within the next 5 years: Repave parking lot, replace perimeter chain link fencing and storage shed, flooring, casework, roofing, roof top mechanical units, water heater, and lighting, provide masonry restoration, security film in select locations, upgrade the fire alarm and public address systems.

Educational program enhancements include renovating the library, multi-purpose room, offices and staff support spaces and creating opportunities for enhanced social emotional learning throughout the building.

Listwood Elementary School

This building currently is a K-3 grade level facility. The one-story building was originally constructed in 2002 and an addition opened in 2016. The building currently has 20,904 of square

footage. Major building components are still functioning, including roofing, mechanical, electrical, and plumbing systems.

The following items are the district's goals of replacement and/or upgrade within the next 5 years: Replace perimeter chain link fencing and storage shed, flooring, casework, roofing, roof top mechanical units, water heater, and lighting, provide masonry restoration, security film in select locations, upgrade the fire alarm and public address systems. A small toilet room addition is also planned to be used for events held at the adjacent athletic fields.

Educational program enhancements include renovating the library, multi-purpose room, offices and staff support spaces and creating opportunities for enhanced social emotional learning throughout the building.

Seneca Elementary School

This building currently is a K-3 grade level facility. The two story plus basement building was originally constructed in 1922. The building currently has 24,920 of square footage. Major building components are still functioning, including roofing, mechanical, electrical, and plumbing systems.

The following items are the district's goals of replacement and/or upgrade within the next 5 years: Repave parking lot, remove abandoned freight elevator, provide canopy at main entrance, replace perimeter chain link fencing and storage shed, flooring, casework, roofing, water heater, provide security film in select locations, upgrade the public address and fire suppression systems.

Educational program enhancements include renovating the library, multi-purpose room, offices and staff support spaces and creating opportunities for enhanced social emotional learning throughout the building.

Iroquois Middle School

This building currently is a 4-6 grade level facility. The three-story building was originally constructed in 1992. The building currently has 68,054 of square footage. Major building components are still functioning, including roofing, mechanical, electrical, and plumbing systems.

The following items are the district's goals of replacement and/or upgrade within the next 5 years. Repave parking lot, regrade athletic field, replace perimeter chain link fencing and storage shed, flooring, casework, doors and hardware, ceilings, roofing, roof top mechanical units, plumbing fixtures, water heater, and lighting, provide masonry restoration, security film in select locations, elevator modernization, upgrade the fire alarm and public address systems. Renovations to student bathrooms are also planned.

Educational program enhancements include renovating the library, multi-purpose room, gymnasiums, cafeteria, art and music classrooms, offices and staff support spaces and creating opportunities for enhanced social emotional learning throughout the building.

Rogers Southlawn School

This building currently is a K-6 level facility. The two story plus basement building was originally constructed in 1928. The building currently has 55,035 of square footage. Major building components are still functioning, including roofing, mechanical, electrical, and plumbing systems.

The following items are the district's goals of replacement and/or upgrade within the next 5 years. Regrade and provide irrigation for athletic fields, replace perimeter chain link fencing and storage shed, flooring, casework, ceilings, roofing, roof top mechanical units, water heater, and

lighting, provide masonry restoration, security film in select locations, upgrade the public address and electrical systems.

Educational program enhancements include renovating the library, multi-purpose room, gymnasium, art and music classrooms, offices and staff support spaces and creating opportunities for enhanced social emotional learning throughout the building. Courtyard renovations to increase experiential learning opportunities are also planned.

Dake Junior High School

This building currently is a 7-8 grade level facility. The two story plus basement building was originally constructed in 1931. The building currently has 111,662 of square footage. Major building components are still functioning, including mechanical, electrical, and plumbing systems.

The following items are the district's goals of replacement and/or upgrade within the next 5 years. Replace exterior stairs and retaining walls, flooring, casework, doors and hardware, ceilings, roofing, roof top mechanical units, water heater, and lighting, provide masonry restoration, security film in select locations, upgrade the fire alarm and public address systems. Renovations to student bathrooms, locker rooms and the kitchen are also planned.

Educational program enhancements include renovating the library, multi-purpose room, gymnasiums, cafeteria, art and science classrooms, offices and staff support spaces and creating opportunities for enhanced social emotional learning throughout the building.

Irondequoit High School

This building currently is a 9-12 grade level facility. The three story plus basement building was originally constructed in 1948. The building currently has 286,726 of square footage. Major building components are still functioning, including roofing, mechanical, electrical, and plumbing systems.

The following items are the district's goals of replacement and/or upgrade within the next 5 years. Replace sidewalks, perimeter chain link fencing, flooring, casework, doors and hardware, lockers, ceilings, roofing, roof top mechanical units, plumbing fixtures, water heater, and lighting (general, theatrical and natatorium), provide masonry restoration, security film in select locations, elevator modernization, upgrade the fire alarm and public address systems. Interior renovations will include the Auditorium, gymnasiums, and natatorium. Outdoor athletic complex renovations will include refurbishing the baseball field, replacing remaining grass fields with a multi-purpose turf field, replacement of fencing, scoreboards and adding a visitors bleacher and press box. A bridge connecting the second floors of IHS and Dake JHS, with airlock vestibules on the first floor of each building, is also planned.

Educational program enhancements include renovating the library, commons, cafeteria, art and music classrooms, offices and staff support spaces and creating opportunities for enhanced social emotional learning throughout the building.

Administration Building

This building currently is the district administration facility. The one-story building was originally constructed in 2005. The building currently has 9,232 of square footage. Major building components are still functioning, including roofing, mechanical, electrical, and plumbing systems.

The following items are the district's goals for replacement and/or upgrade within the next 5 years: Provide additional site lighting, replace doors and hardware, flooring, upgrade fire alarm and mechanical systems.

Evans & McGraw Learning Center

This building currently serves as the district's information technology facility as well as the Teacher Learning Center. The one-story building was originally constructed in 1963. The building currently has 11,012 of square footage. Major building components are still functioning, including roofing, mechanical, electrical, and plumbing systems.

The following items are the district's goals for replacement and/or upgrade within the next 5 years: Provide mechanical systems upgrades and elevator modernization.

Sproule Field House Building

This building currently is used for students 9-12 as a gymnasium. The one-story building was originally constructed in 1997. The building currently has 8,820 of square footage. Major building components are still functioning, including roofing, mechanical, electrical, and plumbing systems.

The following items are the district's goals of replacement and/or upgrade within the next 5 years: Restore the building envelope, replace flooring, doors and hardware, gymnasium divider curtain, lighting and mechanical systems.

Maintenance Building (Washington Ave.)

This building currently is the district's facilities administrative offices, and buildings & grounds shops. The one-story building was originally constructed in 1962. The building currently has 7,266 of square footage. Major building components are in fair condition but still functioning, including roofing, mechanical, electrical, and plumbing systems.

The 2023 RISE Project will relocate these services to the Lakeview Building, allowing the district to eliminate this building from it's inventory.

Lakeview Building

This building currently is the district's facilities storage & leased to a day-care provider. The one-story building was originally constructed in 1954. The building is currently not ADA accessible. The building currently has 14,304 of square footage. Major building components are in fair condition but still functioning, including roofing, mechanical, electrical, and plumbing systems.

The 2023 RISE Project will completely overhaul this building and it's grounds to house the district's Department of Environmental Services. Renovations will include asphalt and concrete paving, abatement, replacement of doors and frames, windows, ceilings, finishes and lighting. Existing mechanical, electrical and plumbing systems will be upgraded and/or replaced.

Oakview Building

This building currently is the district's teacher/student services space & leased to a day-care provider. The one-story building was originally constructed in 1954. The building is currently not ADA accessible. The building currently has 11,860 of square footage. Major building components are in fair condition but still functioning, including roofing, mechanical, electrical, and plumbing systems.

The following items are the district's goals of replacement and/or upgrade within the next 5 years: Repave parking lot and create an ADA accessible exterior route, replace perimeter chain link fencing, windows, flooring, roofing, lighting and mechanical systems, provide fire alarm system and access controls.

Pinegrove Building

This building was recently reacquired by the District and will house district-wide Helmer Nature Center classrooms, STEAM programming, UPK and tutoring services. The one-story building was originally constructed in 1954. The building currently has 11,860 of square footage. Major building components are in fair condition but still functioning, including roofing, mechanical, electrical, and plumbing systems.

The following items are the district's goals of replacement and/or upgrade within the next 5 years: Renovations will include asphalt and concrete paving, abatement, replacement of doors and frames, windows, ceilings, finishes and lighting. Existing mechanical, electrical and plumbing systems will be upgraded and/or replaced.
